

THANARAT CHUEPHASUK

AI Context Engineer | IT Infrastructure

+66 95 934 4939 | thanarat.chue@gmail.com

Portfolio: thanarat-int.github.io/ | Bangkok, Thailand

CORE SKILLS

Programming: Python, TypeScript, JavaScript, C#, C++

AI / LLM: RAG, LangChain, Prompt Engineering, Context Engineering, AI Agents, Vector Search, Embeddings, MCP

LLM Platforms: Claude (Anthropic), GPT (OpenAI), Gemini (Google), Vertex AI, Local Models

Frameworks / Automation: FastAPI, React, Next.js, Node.js, Robot Framework, Playwright, Selenium, n8n, Power Automate, Apache Airflow

Infrastructure: Linux Server, Windows Server, Docker, Ansible (AWX), VMware, Fortinet, Cisco, Git, Grafana, GCP, AWS

Databases: PostgreSQL, SQL Server, MongoDB, Firebase, Supabase, ChromaDB, Qdrant, Pinecone

Platforms / BI: Power BI, Power Apps, Google Apps Script, AppSheet, Looker Studio

PROFESSIONAL EXPERIENCE

Sirivatana Interprint Public Company Limited

2026 - Present

AI Context Engineer | Bangkok, Thailand

- Design and develop AI-enabled applications and automation solutions for assigned business use cases.
- Analyze legacy workflows and implement modern tools and AI applications to improve efficiency and support digital transformation initiatives.
- Partner with cross-functional teams to deliver AI-driven solutions aligned with operational needs.
- Manage AI model and digital tool usage with attention to performance, cost efficiency, and return on investment (ROI).

C.J. Express Group Co., Ltd.

2021 - 2026

IT Infrastructure Section Head | Bangkok, Thailand

- Led infrastructure rollout for new branches nationwide, ensuring reliable deployment, high availability, and on-time readiness.
- Automated Linux and POS provisioning using AWX (Ansible), reducing manual setup effort and deployment errors.
- Built Python scripts to streamline system administration and operational tasks across multiple sites.
- Troubleshoot deployment and configuration issues across distributed branch environments.
- Managed enterprise network infrastructure including Fortinet firewalls, Cisco switches, and wireless access points.

Lazada Co., Ltd.

2020 - 2021

IT Officer | Bangkok, Thailand

- Maintained warehouse IT systems, supported basic server setup, and provided remote troubleshooting for end users.
- Managed backups and automated routine tasks to improve support efficiency.

KEY PROJECTS

RFQ Wizard — AI-Powered Cost Estimation Platform

2026

Tech Stack: Python, FastAPI, Next.js, React, TypeScript, PostgreSQL (pgvector), Three.js, Claude (Opus 4.6 / Sonnet 4.5), Docker, Git

- Designed and built an end-to-end AI-powered cost estimation platform for the printing and packaging industry, replacing manual quotation workflows with an intelligent multi-component pricing engine.
- Developed an autonomous AI Agent (Claude Opus 4.6 + Sonnet 4.5 hybrid) integrated with the legacy ERP via API to extract historical estimation data, learn pricing patterns, and replicate domain logic in a modernized system.
- Implemented an AI chat + document parser pipeline that auto-fills specification forms from uploaded RFQ documents (PDF, Excel, Word, images), summarizes extracted fields, and asks blocking clarification questions for missing data.
- Built an automatic layout calculation engine and interactive 3D box visualization (Three.js) with artwork upload, allowing users to preview packaging in real-time before quotation.
- Engineered a hybrid AI + rule-based pricing recommendation system that calculates and compares alternative spec options in real-time, helping sales teams suggest optimized configurations beyond the original request.
- Architected the full stack from requirements gathering and system design to backend (~25 endpoints, 12 database models), frontend (20+ specialized components), Dockerized deployment, and JWT authentication.

Enterprise RAG Chatbot — AI Assistant

2026

Tech Stack: Python, FastAPI, React, Qdrant, Gemini / Claude / GPT, Airflow, Docker, Git

- Built a multi-user AI chatbot with custom RAG pipeline for internal document search across PDFs, Word, Excel, and PowerPoint files.
- Implemented multilingual embeddings (multilingual-e5-large) with per-user vector collections and OCR-based document ingestion via Airflow DAG synced from Google Drive.
- Integrated multiple LLM providers (Gemini, Claude, OpenAI, Ollama) with streaming responses and read-only ERP database access.
- Developed an intelligent voice mode with a meeting-listening feature — the assistant passively transcribes ongoing conversations without interrupting and only responds when called by name, then prompts the user for the topic to discuss.

Sales Tracking & Forecasting Platform

2025

Tech Stack: Power Apps, Dataverse, Power Automate, Power BI, Python (ARIMA), Pandas

- Developed a cross-platform (web / mobile) sales tracking app on Power Apps with Dataverse backend, enabling field staff to record daily branch sales, manage user directories, and view embedded Power BI dashboards (Total Sales, Net Margin, drill-down by branch and product category) directly in-app.
- Designed an automated data pipeline that ingests Excel sales files dropped into a shared server path and triggers real-time auto-refresh of the Power BI dataset, eliminating manual data updates.
- Built a Python ARIMA forecasting model to generate 90-day sales predictions from historical data, supporting inventory and revenue planning decisions.
- Automated weekly executive reports via Power Automate, delivering sales summaries to management through Email and Microsoft Teams every Monday at 07:00 AM.

EDUCATION

Sripatum University

Aug 2025

Bachelor's Degree in Information Technology

- GPA: [3.52]

Eastern College of Technology

Sep 2019

Diploma in Business Computer

- GPA: [2.89]

LANGUAGES

Thai: Native

English: Reading — Working Proficiency (technical documentation)

ADDITIONAL INFORMATION

- Open to remote, hybrid, and on-site opportunities
- Available to start within 1 month
